

WHO WE ARE!

- At COACH GLOBAL, place great value on excellent service, competitive pricing and high quality. We maintain open and honest relationship not only with our clients but also with all major global players in the stone industry. This allows us to overcome any obstacles and uphold our sacred policies and values.
- When choosing natural stone for a project, we should always remember history to give it more character. The colour variation, the appearance of fossils in the stone, the different veining's are proof of its unicity. As each piece was shaped by nature differently, natural stone is very versatile and it can be used in many different settings, from a Luxury classical look to the most modern and contemporary locations.
- Granite is one of the trendiest materials in the construction of the house. It serves as the natural beauty that is quite different from the other natural stone. Because of natural beauty it gives richness to your home. There are many different properties of granite that makes it ideal for a kitchen countertop, bathroom vanity tops, pathway, cladding, etc. There are various properties of granite like durability, scratch resistant, heat resistant, porosity, etc. It is now popularly used for door-window frames, sill-jamb, etc.
- We strive for a high-performance culture of continuous improvement, innovation, and quality in all aspects of our work. We always perform and deliver our work the right way for our clients.

MINES & QUARRY :

We at Balaji Granite, have our own large stone mines of natural stones. These mines located in the state of Gujarat(Mahesana), form a strong base for speedy production and consistent quality of natural stone. Our mines are approved by the Government of India. To ensure timely delivery of good quality products, we maintain state of the art machine & equipment at the mines & quarry locations. We are offering CANADIAN BROWN granite blocks.
